Labor and Birth Complications Skills Rubric

Students will be assessed as they *perform midwifery skills* simulated with live or non-living models.

Students will be evaluated on skill performance, clinical reasoning and professionalism

STANDARDS OF PROFESSIONAL BEHAVIOR

The midwife:

- uses standard/universal precautions, infection prevention and control strategies, and clean technique
- behaves in a courteous, non-judgmental, non-discriminatory, and culturally appropriate manner with all clients
- is respectful of individuals and of their culture and customs, regardless of socioeconomic status, race, ethnic origin, sexual orientation, gender, physical ability, cognitive ability, or religious belief
- maintains the confidentiality of all information shared by the woman; communicates essential information among other health providers or family members only with explicit permission from the woman and in situations of compelling need
- uses shared decision-making in partnership with women and their families; enables and supports them in making informed choices about their health, including the need or desire for referral or transfer to other health care providers or facilities for continued care when healthcare needs exceed the abilities of the midwife provider and their right to refuse testing or intervention
- works collaboratively with other health care workers to improve the delivery of services to women and families

Assessors, please mark each skill with one of the following designations:

- Unmet-this student is unable to perform this skill even with prompting.
- **Developing**-the student is developing this skill, but it is not yet at a level you would expect from an entry level midwife. Or student performs skill with some prompting or help.
- **Competent**-the student performs this skill at the level you would expect from an entry level midwife, either in clinical practice or on models, adequately and without prompting.
- **Exemplary**-the student performs this skill with unusual proficiency and confidence, beyond expectations for an entry level midwife.

	U	D	С	Ε
4.41 Recognize and differentiate meconium stained fluid, suction airway if				
appropriate/ Assessment of Meconium Staining (IV-20)				
4.43.f Manage immediate interventions for emergency: fetal distress/				
Abnormal Fetal Heart Tones & Patterns (IV-31)				
4.44 Manage nuchal cord/arm at birth/ Management of Nuchal Cord				
(IV-27)/ Management of Nuchal Hand/Arm (IV-28)				
4.37 Perform episiotomy as needed/ Episiotomy (IV-34)				
4.39 Perform hand maneuvers for face delivery/ Face and Brow				
Presentation (IV-35)				
4.43.a Manage immediate interventions for emergency: prolapsed cord/				
Cord Prolapse (including when birth is imminent) (IV-43)				
Abnormal Changes in Maternal Vital Signs (IV-22)				
(Maternal) Administration of Oxygen (free flow and demand-valve or				
bag-valve-mask) (II-24)				
Ritgen Maneuver (IV-26)				
Abnormal Intrapartal Bleeding (including when birth is imminent) (IV-47)				
4.43.b Manage immediate interventions for emergency: placental				
abruption/ Placenta Abruptio (III-69)				
4.43.c Manage immediate interventions for emergency: uterine rupture				
4.43.d Manage immediate interventions for emergency: malpresentation				
4.43.e Manage immediate interventions for emergency: shoulder				
dystocia/ Shoulder Dystocia (McRoberts & Gaskin maneuvers)(IV-29)				
Emergency Manual Dilation (IV-45)
